

28. The multi-modal device as defined in claim 24, further including a data processor means for processing digital data sent and/or received over said frequency agile transceiver.

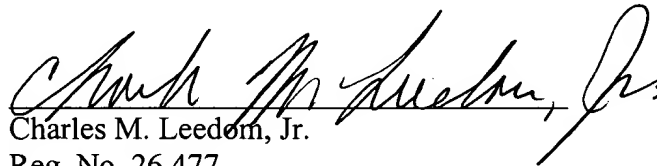

29. The multi-modal device as defined in claim 24, wherein said protocol agile operating circuit means is adapted to cause said frequency agile transceiver to control telephone call placement and call answering functions over wireless communication networks having such telephone functions.- -

---

REMARKS

The above new claims are being submitted to seek the scope of protection to which applicants are entitled.

Respectfully submitted,
